a Frederick Steel Solution

## with Enhanced Thermal Cutting Capabilities

### HPR 400 Plasma BEVELING Torch Capabilities

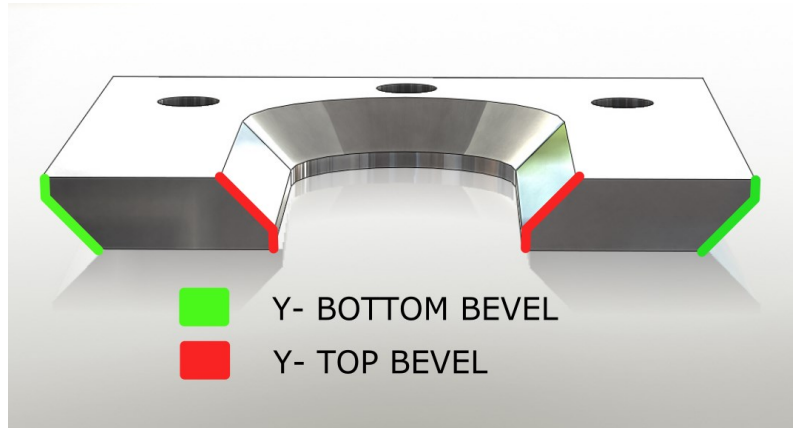

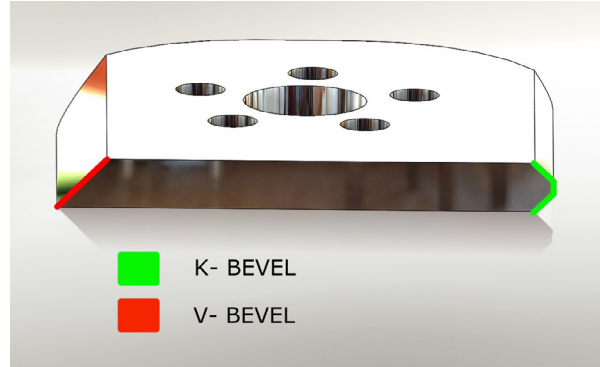

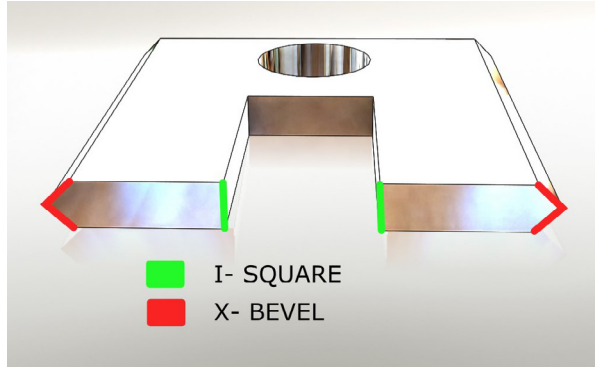

- Smooth and accurate beveling head motion provides minimal tapering in holes and around outside perimeter of parts
- True Hole technology with Hypertherm software allows for less than 1:1 ratio for bolt hole quality
- Interior and exterior contour beveling (max bevel is 1-3/8" at 45°)
- Production cutting for up to 2" thick carbon plate
- 10' x 50' cutting surface for larger and longer parts

**FAMILY OWNED SINCE 1933**

## Common Bevel Cut Examples
